

This book provides a review and synthesis of the current state of information on the ecotoxicology of contaminants in amphibians and reptiles. Twenty-six leading scientists present 15 chapters dealing with such topics as ecological, physiological, and distributional considerations; responses and body burdens of major groups of contaminants; specific contaminant-related problems including deformities, diseases, endocrine disruption, and declining populations; and the use of amphibians and reptiles in risk assessments. The book is an excellent source of information for contaminant ecologists who are interested in these seldom-studied but extremely important animals, for herpetologists who are interested in how contaminants may affect their species of concern, and for those with a general interest in ecology and ecotoxicology.

Great Debates in Medical Law and Ethics (Palgrave Great Debates in Law), Marriage by Mistake: A San Francisco Gold Rush Romance (Gold Rush Romances Book 3), Paleo Grilling Recipes (Caveman Cookbooks), Up in Flames: Erotica poems, King Solomons mines, Manhattan: An Island in Focus, The Anatomy Students Self-Test Coloring Book, Chasing Diaries (A Chasing Series Novella), Head-to-toe Examination of the Child Video: Head-to-toe Examination (Saunders Physical Examination & Health Assessment), Children of the Voyager (1993) #3 (of 4),

Building on the success of its popular predecessor, the second edition of Ecotoxicology of Amphibians and Reptiles presents newly available findings on the. Ecotoxicology of Amphibians and Reptiles Advisory Group (EARAG) . dissemination of technical information through the SETAC Publication Advisory Council. caskeylees.com: Ecotoxicology of Amphibians and Reptiles (Setac Technical Publications Series): Great condition with minimal wear, aging, or shelf wear. 15+ million members; + million publications; k+ research projects . Amphibians, fish, and reptiles are poikilothermic animals. the innocuousness of atrazine, it was a series of papers by Hayes and .. (eds) (b) Ecotoxicology of amphibians and reptiles, 2nd edn.
