

In words and images, writer and photographer Will Landon of Bellevue, Washington, captures the majesty and diversity of Montanas Glacier National Park. In sweeping panoramas of up to 360 degrees, counterpointed by intimate close-ups and highlighted segments of a grand scene, Landon explores the vast scope of the northernmost national park in the continental United States. This is Glacier Panorama, photographed over a period of twenty-two years, from 1968 to 1990. A photographer adept at handling the wide variety of cameras needed to convey the diversity of Glaciers natural beauty, Landon has included scenes familiar to those who only have time to drive through the park or take short day hikes, as well as images of many of the remote and ruggedly beautiful areas few visitors ever see. Accompanying Landons photographs are written impressions from his Glacier journals, and the names of the many magnificent peaks he has captured on film. Glacier Panorama is an extraordinary book, destined to be a classic of its kind.
