

This novel approach to learning neuroanatomy features a 2-page art/text format that stimulates the important aspect of integrated (right-brain/left brain) learning. Visual presentation is supported by text, rather than text supported by visual. A provocative, experiential color-to-learn mode actively engages the student in exploring the high-quality diagrams and brain dissections. Composite summaries are featured in the 2-page format, and the visual simplicity of labels and legends renders difficult material in a non-intimidating manner. Numerous review questions with answers and explanations help the reader assess what has been covered.
