

You dont have to be thin to feel small. Donnies life is unraveling. His parents marriage is falling apart, and his sister is slowly slipping away in the grip of her illness. To top it all off, he accidentally starts a rumor at school that hurts someone he cares about and leaves him an outcast. So Donnie does the only thing he knows how to do: He tries to fix things, to make everything the way it was before. Before his parents stopped loving each other, before his sister disappeared, before he was alone. But some things are beyond repair, and it will take all Donnies strength to stop looking back and start moving forward again.

The skin is the largest organ of the body, with a total area of about 20 square feet. The epidermis, the outermost layer of skin, provides a waterproof barrier and creates our skin tone. The dermis, beneath the epidermis, contains tough connective tissue, hair follicles, and sweat.

Your skin has a big job to do protecting your body, so it's made to be tough and stretchy. There is a lot more to this job than it might seem. There are three main.

Human skin, in human anatomy, the covering, or integument, of the body's surface that both provides protection and receives sensory stimuli from the external.
